

**Letter of Reference to  
Professional Trailbuilders Association  
For Brooke Scatchard of Sinuosity**

January 18, 2013

Dear Reader:

Brooke Scatchard of Sinuosity designed and built a multi-use trail network for us last Spring on a 146 acre property we own in the Town of Cambridge, NY. It was a more than satisfactory experience for us.

Brooke took a professional approach to the design process - determining what we wanted, familiarizing himself with the land and using his knowledge, skill and creativity to bring all the factors together in a plan. We went into the construction phase with a clear understanding of the scope of work, timetable and estimated cost. Brooke then built the trail network in line with the plan and on time and budget. The trails themselves were well constructed and have proved durable and simple to maintain. He was thoughtful and easy to work with throughout the process.

My wife and I are pleased to give Brooke an unqualified recommendation.

Sincerely,

John LaPann
